**ARE YOU MONITORING
YOUR HEALTH?**

BREAST CANCER MONITORING BLOOD TEST

Why Choose Our Test?

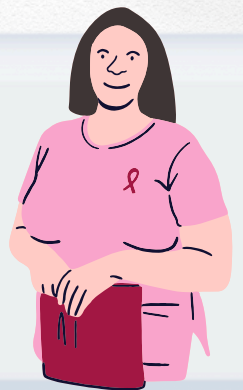

Our cutting-edge DNA methylation test identifies cancer-related changes in the blood, **ensuring earlier detection of recurrence or metastasis and tracking treatment effectiveness.**

- ✓ **Accurate Monitoring and Tracking**
- ✓ **No Time Restrictions**
- ✓ **Minimal Blood Sample Required**

Who Needs This Test?

- Those with a family history of breast cancer.
- Breast cancer survivors and patients under treatment.
- Anyone concerned about their risk of recurrence.
